PANELLISTS

CFE Tax Advisers Europe's 14th European Conference on Professional Affairs is based on the discussion paper recently published by CFE seeking to promote ethical professional judgment across all tax advisers in Europe. The conference will feature speakers from a wide range of stakeholder perspectives who will discuss the paper's ethics quality bar initiative, which proposes five key questions for tax advisers to reflect on when undertaking their advisory role in the overall tax system. Panellists will consider whether the quality bar can help to steer advisers in the direction of an appropriate balance between the rights and obligations of taxpayers, avoiding abusive planning.
